Press Release: 16.JUNE.2009

ASI F430 Project: Body Kit Debut and Future Development Schedule

ASI proudly announces the culmination of our first major project outside of the Bentley Continental series: the **ASI Ferrari F430 body kit** and performance line-up.

Applying expert Japanese technical analysis, careful testing and a truly imaginative and spirited design is not only our business, it's our **passion**. Thoroughly tested both around the city and around the track, we are confident that we are releasing what will quickly become the tuning world's most important Ferrari F430 body kit.

Comprised of front bumper, side skirts and rear bumper, ASI's Ferrari F430 body kit offers aerodynamic performance identical to Ferrari stock parts but at a **27kg weight reduction**, not to mention the easily distinguishable new ASI flare. Our rear bumper is compatible both with the F430's stock exhaust and ASI's new exhaust system, which will offer further performance enhancements via "Scuderia-style" centered exhaust tips.

BODY KIT	Front Bumper	5,000 USD
	Side Skirts	4,000 USD
	Rear Bumper	6,000 USD
	Full Body Kit	15,000 USD
	ECU Tuning ¹	7,500 USD
	Sachs Suspension System ²	13,000 USD

¹: Improves mid-range torque.

²: Cancellers included (prevents Ferrari ECU errors).

ASI F430 Project Release Schedule (2009)

Dry Carbon Rear Wing	Late June
Front Brake System	Late June
Diffuser Fins	Early July
ASI Center-tip Exhaust System	Mid July
19-Inch Forged Wheel	Early August

ASI Bentley

Alongside our Ferrari F430 project, ASI has pressed forward with more development for the Bentley Continental series. Our AV signal bypass system is better than ever (now allowing navigation and rear camera display signals plus two additional input signals of user choice).

Our suspension lowering module is easier to use and problem free thanks to our new installation **adapter**.

And our **high performance exhaust system** has been more finely tuned both for both power and acoustics. Simply by combining ASI's ECU tuning package and exhaust system, your Bentley Continental GT, GTC, or Flying Spur (both normal and Speed versions) will be able to muster an inebriating 700 horsepower. (We know you will use your power responsibly)

Our revamped factory and production methods have also made it possible to produce the same body kits as before for significantly lower cost. We're glad to be able to pass this savings along to our new owners with **lower prices** for our Bentley Continental line body kits.

ASI Bentley Price Lists (Click to Download PDF) (PRICES EFFECTIVE FROM JUNE 16, 2009.)

<p>GT / GT SPEED</p>	<p>GTC / GTC SPEED</p>	<p>FLYING SPUR</p>	<p>EXHAUST SYSTEM</p>
